

POCKETPEAK® PEAK FLOW METER

COMPACT AND EASY TO USE

The PocketPeak® peak flow meter is a simple, portable, convenient device that measures air flow, or peak expiratory flow rate (PEFR). This compact meter measures 50-720 LPM and has colored markers allowing patients to easily monitor changes in air flow. Compact and easy to use, the PocketPeak® is not only ergonomically designed, but dishwasher-safe and has reusable plastic mouthpieces. PocketPeak® peak flow meter meets or exceeds all National Asthma Education Program and National Heart, Lung, Blood, Institute standards. Patient educational video available.
